PRODUCT CATALOGUE 2026

Endodontics · Restoratives · Disposables

www.famasco.net · info@famasco.net

Welcome to Farma Dent

Farma Dent is the dental brand of Famasco, a trading and distribution company. We bring together a focused range of endodontic, restorative and disposable products for dental clinics and distributors.

This catalogue presents our Endo Touch endodontic line, our Farma restorative range and our everyday disposables – each with clear product information and packaging options.

1. **Focused range**
   Endodontics, restoratives and disposables, organised for everyday clinical use.
2. **Distributor friendly**
   Clear product information and packaging options for every item.
3. **Direct contact**
   One address for quotations, samples and orders.

ENDODONTICS

Rotary & reciprocating files 4
Retreatment & path files 10
Gutta percha & paper points 11
Endomotors 12
Sealers & MTA 13
Irrigation & gels 15

RESTORATIVES

Nano composites 18

Action

Rotary files · variable taper

Action Gold Rotary Files

Action Gold Rotary Files are precision-engineered nickel-titanium instruments tailored for advanced endodontic shaping. With unique gold heat-treated technology, these files offer exceptional flexibility and superior resistance to cyclic fatigue. Their innovative design ensures efficient canal preparation while reducing the risk of iatrogenic damage, making them an excellent choice for reliable and safe endodontic procedures.

- Rotation Files
- Variable Taper
- Better Cutting Efficiency
- X2 Times Better Cyclic Fatigue Resistance Than Conventional Files
- Excellent Strength
- No Bounce Back
- Respect Original Anatomy Of Root Canal
- Great Fracture Resistance
- Lasered Taper and Size Information On The Shank
- Autoclavable Box

Wire	Gold
Length	21mm, 25mm, 31mm
Packaging	6 Files

Action Blue Rotary Files

Action Blue Rotary Files are state-of-the-art nickel-titanium instruments designed to simplify and enhance endodontic shaping. With advanced blue heat treatment, these files deliver outstanding flexibility and durability, allowing smooth navigation through intricate canal systems while minimising the risk of file separation. Their cutting-edge design ensures efficient debris removal and optimal shaping for superior clinical outcomes.

- Rotation Files
- Variable Taper
- Better Flexibility
- X4 Times Better Cyclic Fatigue Resistance Than Conventional Files
- Excellent Strength
- No Bounce Back
- Respect Original Anatomy Of Root Canal
- Great Fracture Resistance
- Lasered Taper and Size Information On The Shank
- Autoclavable Box

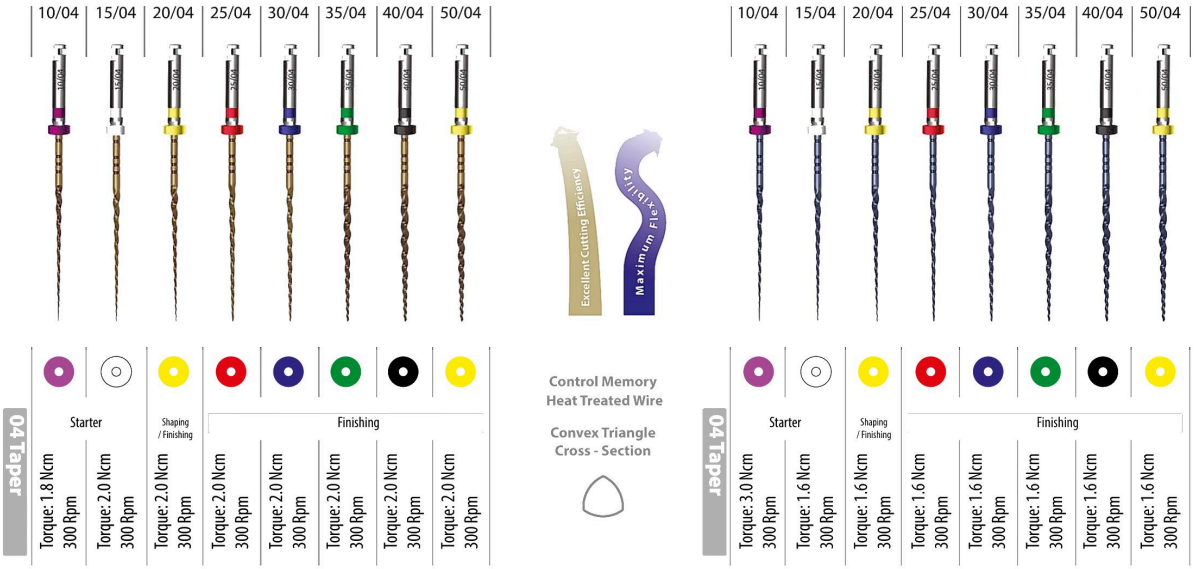

Wire	Blue
Length	21mm, 25mm, 31mm
Packaging	6 Files

KIT OPTIONS SX - S1 - S2 - F1 - F2 - F3

FARMADENT DENTAL SUPPLIES

Smart

Rotary files · 04 taper

Smart Gold Rotary Files

Smart Gold Rotary Files are 4% taper advanced nickel-titanium instruments designed for precision and efficiency in endodontic treatments. Featuring cutting-edge gold heat treatment, these files provide an optimal balance of flexibility and strength, ensuring seamless navigation through intricate canal anatomies. With enhanced cutting efficiency and exceptional resistance to fatigue, Smart Gold Rotary Files deliver consistent and predictable results for every procedure.

- Rotation Files
- Regular Taper
- Better Cutting Efficiency
- X2 Times Better Cyclic Fatigue Resistance Than Conventional Files
- Excellent Strength
- No Bounce Back
- Respect Original Anatomy Of Root Canal
- Great Fracture Resistance
- Lasered Taper and Size Information On The Shank
- Autoclavable Box

Wire	Gold
Length	21mm, 25mm, 31mm
Packaging	6 Files

Smart Blue Rotary Files

Smart Blue Rotary Files are high-performance 4% taper nickel-titanium instruments designed to meet the demands of modern endodontic procedures. With advanced blue heat treatment, these files provide exceptional flexibility and fracture resistance, ensuring smooth navigation through complex canal systems. Their optimised cutting design enhances efficiency and precision, delivering reliable and consistent results for every treatment.

- Rotation Files
- Regular Taper
- Better Flexibility
- X4 Times Better Cyclic Fatigue Resistance Than Conventional Files
- Excellent Strength
- No Bounce Back
- Respect Original Anatomy Of Root Canal
- Great Fracture Resistance
- Lasered Taper and Size Information On The Shank

Touch

Rotary files · 06 taper

Touch Gold Rotary Files

Touch Gold Rotary Files are premium 6% taper nickel-titanium instruments designed for exceptional performance in endodontic treatments. Utilising advanced gold heat treatment technology, these files offer unmatched flexibility, strength and fatigue resistance. Their innovative cutting design ensures smooth navigation through intricate canal systems while minimising the risk of file separation, making them ideal for precise and efficient endodontic procedures.

- Rotation Files
- Regular Taper
- Better Cutting Efficiency
- X2 Times Better Cyclic Fatigue Resistance Than Conventional Files

Touch Blue Rotary Files

Touch Blue Rotary Files are cutting-edge 6% taper nickel-titanium instruments designed to provide superior precision and efficiency in endodontic treatments. Featuring advanced blue heat treatment, these files offer exceptional flexibility, durability and resistance to fatigue, ensuring smooth navigation through even the most challenging canal anatomies. Their innovative design promotes effective debris removal and accurate shaping for optimal clinical outcomes.

- Rotation Files

FARMADENT DENTAL SUPPLIES

Prime

Rotary files · asymmetrical section

Prime Gold Rotary Files

Endo Touch Prime Gold Rotary Files are designed for optimal canal preparation, offering enhanced debris removal and smooth navigation. With a specialised surface structure and an asymmetrical design, these files ensure comfortable and controlled movement within the canal. Prime Gold files also offer superior fracture resistance compared to standard Ni-Ti files, along with high sharpness and efficient cutting performance.

- Rotation Files
- Asymmetrical Section
- Variable Taper
- Better Cutting Efficiency
- X2 Times Better Cyclic Fatigue Resistance
- Great Fracture Resistance
- Lasered Taper and Size Information On The Shank

Prime Blue Rotary Files

Endo Touch Prime Blue Rotary Files are engineered to provide efficient debris removal and precise canal shaping while ensuring comfortable navigation. With a unique surface structure and an asymmetrical design, these files allow smooth movement within the canal. Prime Blue files feature high flexibility and special control memory, enabling pre-bending without entering the canal for versatility and accuracy.

- Rotation Files

FARMADENT DENTAL SUPPLIES

Expert

Reciprocation files · single-file system

Expert Gold Reciprocation Files

Endo Touch Expert Gold Reciprocation Files are designed for efficient single-file root canal treatments with a reciprocating motion. These files feature alternative tapers (6% and 4%) ideal for single-file systems. Compatible with endomotors capable of reciprocating movement, Expert Gold files offer a rotation angle adjustment of 150° left and 30° right. Advanced heat treatment provides superior flexibility and durability, with higher fracture resistance and sharpness than standard Ni-Ti files.

- Reciprocation Files
- Regular Taper
- Better Cutting Efficiency
- X2 Times Better Cyclic Fatigue Resistance Than Conventional Files
- Excellent Strength
- No Bounce Back

Pedo

Rotary files · for pedodontic cases

Pedo Gold Rotary Files

Endo Touch Pedo Gold Rotary Files are specifically designed for paediatric endodontic cases, featuring a shorter length of 18 mm for precise and safe treatments. Utilising advanced heat treatment technology, these files provide superior flexibility and durability in a Ni-Ti structure, with enhanced sharpness and fracture resistance for reliable and effective performance in paediatric dentistry.

- Rotation Files
- Specially Produced For Pedodontic Cases
- Regular Taper
- Better Cutting Efficiency
- X2 Times Better Cyclic Fatigue Resistance Than Conventional Files
- Excellent Strength
- No Bounce Back
- Respect Original Anatomy Of Root Canal
- Great Fracture Resistance
- Lasered Taper and Size Information On The Shank

Retreatment & Path

Retreatment files · glide path files

Retreatment Files

Endo Touch Retreatment Rotary Files are specifically developed for repeated root canal treatments. With high cutting efficiency, they are designed for the effective removal of canal filling materials. The system consists of three instruments – D1, D2 and D3 – for the coronal, middle and apical sections of the canal. D1 features an active cutting tip for initial entry, while the following instruments keep a non-cutting tip for precise debris removal.

- Rotation Files
- Specially Produced For Retreatment Cases
- Designed To Remove Filling Materials Like Gutta Percha
- X2 Times Better Cyclic Fatigue Resistance Than Conventional Files
- Better Cutting Efficiency
- Great Fracture Resistance
- Lasered Taper and Size Information On The Shank
- Autoclavable Box

Wire	Gold
Length	16mm, 18mm, 22mm
Packaging	6 Files

Path Gold Rotary Files

Path Gold Rotary Files are specifically designed to create a glide path for precise canal preparation. Used in combination with hand files, they significantly reduce the risk of step formation and perforation. The files come in size 16/02 with rounded ends to prevent steps and zips, ensuring a safe and efficient path for subsequent canal treatment.

- Rotation Files
- Specially Produced For Creating Glide Path
- Easily Reach Apex
- Better Flexibility
- X2 Times Better Cyclic Fatigue Resistance Than Conventional Files
- Great Fracture Resistance
- Lasered Taper and Size Information On The Shank
- Autoclavable Box

Wire	Gold
Length	21mm, 25mm, 31mm
Packaging	6 Files

KIT OPTIONS Retreatment Kit: D1-D1-D2-D2-D3-D3

FARMADENT
DENTAL SUPPLIES

Gutta Percha & Paper Points

Endo Touch Gutta Percha Points

High-quality root canal filling material designed for easy and efficient fillings. Variable tapers and sizes meet the diverse needs of dental professionals, for excellent performance and precise results.

PROPERTIES

- Variable taper options: available in 02, 04 and 06 tapers
- Excellent radiopacity: clear visibility under radiographic examination
- Length marked: accurate placement and reduced risk of overfilling
- Hand rolled: consistent quality and reliability

Endo Touch Paper Points

Absorbent paper points specifically designed to dry root canals effectively, in a variety of sizes and tapers, for excellent absorbency, sterility and precise results.

PROPERTIES

- Highly absorbent: efficient drying of root canals
- Sterile packaging: high standards of hygiene and safety
- Variety of sizes and tapers for different clinical requirements
- Length marked: accurate placement
- Hand rolled: consistent quality and reliability

Endomotors

Endo Touch Endomotor Pro

A cordless endomotor with an integrated apex locator function, designed by Woodpecker. This advanced endodontic device ensures precise and efficient root canal treatments.

PROPERTIES

- Ready program settings optimised for different file systems
- Rotation modes: clockwise, anti-clockwise and reciprocating
- Speed range: 50 – 1800 rpm, torque up to 5.0 N.cm
- Micro USB charging
- 6:1 contra angle for optimal control and precision
- Auto start in the root canal
- Auto reverse to prevent file binding
- Brushless motor for durability and high performance
- 360° rotating contra angle

Endo Touch Endomotor

A brushless endomotor with an integrated apex locator function, designed by Sani.

PROPERTIES

- 10 ready program settings optimised for different file systems
- Rotation modes: clockwise, anti-clockwise and reciprocating
- Speed range: 50 – 1800 rpm, torque up to 5.0 N.cm
- Micro USB charging
- 1:1 contra angle for optimal control and precision
- Auto start in the root canal
- Auto reverse to prevent file binding
- Brushless motor for durability and high performance
- 360° rotating contra angle

Bioceramic Sealers

Endo Touch Bioceramic Sealer

A highly biocompatible, premixed injectable calcium aluminosilicate paste for root canal filling and sealing. High pH and bioactive properties support remineralisation through hydroxy-apatite formation.

PROPERTIES

- Resin-free: biocompatibility and safety
- High pH: promotes antibacterial activity and healing
- No shrinkage: stable, intact seal
- Radiopaque: clear visibility on radiographs
- Highly flowable: excellent adaptation to canal walls
- Non-toxic
- Good setting time, no mixing needed

PACKAGING

1g in a syringe x 2

Endo Touch Bioceramic Sealer Powder & Liquid

A bioceramic root canal sealer in powder and liquid form for permanent root canal treatments. Its high pH and bioactive properties aid remineralisation through hydroxy-apatite formation.

PROPERTIES

- Resin-free: biocompatibility and safety
- No shrinkage: stable, intact seal
- High purity
- Highly biocompatible
- No moisture required
- Great handling and smooth application

PACKAGING

5g powder and 5 ml liquid

MTA & Root Canal Sealer

Endo Touch MTA Powder & Liquid

MTA (Mineral Trioxide Aggregate) is a tricalcium silicate-based root canal repair material. Its biocompatible, fine-grain powder allows easy and successful treatment: root canal perforation, apical plug during apexification, pulp capping, pulpotomy and root canal filling.

PROPERTIES

- Excellent handling properties
- High pH
- Promotes mineralisation of tissue
- Radiopaque
- No discolouration

PACKAGING

0.14 g MTA powder – 5 ml liquid

0.14 g MTA powder x 7 – 5 ml liquid

1 g MTA powder – 5 ml liquid

Endo Touch Root Canal Sealer

A radiopaque zinc oxide-based sealer and filling material for permanent root canal treatments, with excellent marginal sealing and antibacterial properties.

PROPERTIES

- Easy mixing for quick preparation
- Antibacterial effect helps prevent infection
- Perfect marginal sealing for a long-lasting seal
- Compatible with gutta percha points

PACKAGING

15g powder and 10 ml liquid

Irrigation & Gels

FarmaEdta 17% EDTA Gel

A root canal preparation gel with superior lubrication and cleaning efficiency, dispensed with precision application tips.

PROPERTIES

- Enhanced cleaning: removes smear layer and debris
- File breakage prevention: lubrication reduces friction

PACKAGING

3ml syringe | 3ml syringe x 2 | 3ml syringe x 4

Endo Touch EDTA Solution

A highly effective irrigation solution for preparing and thoroughly cleaning root canals, available in 17% and 5% EDTA.

PROPERTIES

- Rapid cleaning of debris and smear layer
- Neutral pH, gentle on dental tissues

PACKAGING

250ml liquid

Endo Touch Chlorex Gel

A powerful 2% chlorhexidine gel for root canal preparation, combining antibacterial properties with easy application.

PROPERTIES

- 2% chlorhexidine digluconate: potent antibacterial effect
- Thorough cleaning and effective lubrication

PACKAGING

2g syringe

Endo Touch Chlorex

A 2% chlorhexidine digluconate irrigation liquid that enhances the mechanical preparation and cleaning of root canals.

PROPERTIES

- Potent antibacterial properties
- Thorough removal of debris and smear layer
- Supports mechanical preparation

PACKAGING

250ml liquid

SECTION 02

Restoratives

The Farma restorative range: composites, compomers, bonding and etching, liners, finishing pastes, sealants and amalgams.

Nano composites	18
Posterior & flowable composites	19
Compomers	20
Bonding agents	21
Etching gels	22
Liners & calcium hydroxide	23
Polishing & try-in pastes	24
Sealants & pattern resin	25
Capsule amalgams	26
Powder amalgams	27

Nano Composites

FarmaFill Nano Composite

A radiopaque, cost-effective nano hybrid composite for anterior and posterior restorations, combining nano filler technology with superior handling for excellent aesthetics, durability and abrasion resistance.

PROPERTIES

- Universal nano composite with universal shade compatibility
- Light reflection: nano fillers mimic natural tooth structure
- High filler rate for long-lasting restorations
- Polishable to a high gloss
- User-friendly application

PACKAGING

Refill: 4g syringe

Kit 1: 4g syringe (6 pcs), 5ml FarmaBond, 3ml FarmaEtch and accessories

Shades: A1, A2, A3, A3.5, B1, B2, C1, D3, OA2, Extra Bleach

FarmaComp Nano Composite

A versatile, radiopaque nano hybrid composite for anterior and posterior restorations. Nano fillers enhance light reflection for a natural appearance that blends with the surrounding tooth structure.

PROPERTIES

- Higher aesthetics with natural-looking results
- High filler rate for strength and durability
- Polishable to a high gloss
- User-friendly handling

PACKAGING

Refill: 4g syringe

Kit 1: 4g syringe (6 pcs), 5ml FarmaBond, 3ml FarmaEtch and accessories

Shades: A1, A2, A3, A3.5, B1, B2, C1, D3, OA2, Extra Bleach

Posterior & Flowable Composites

FarmaComp P Posterior Composite

A high-quality composite specifically designed for posterior restorations, with excellent handling, superior strength and a natural appearance.

PROPERTIES

- High strength for significant chewing forces
- Resistant to chewing force over time
- No discolouration after polymerisation

PACKAGING

Refill: 4g syringe

Kit 1: 4g syringe (6 pcs), 5ml FarmaBond, 3ml FarmaEtch and accessories

Shades: A1, A2, A3, A3.5, B1, B2, C1, D3, OA2, Extra Bleach

FarmaFlow Flowable Composite

A light-curing, radiopaque flowable composite for small cavities, lining and repairs, combining aesthetic appeal with superior mechanical properties.

PROPERTIES

- Low shrinkage, low wear
- High-gloss polishability
- Very good marginal adaptation

PACKAGING

Refill: 2g syringe

Kit 1: 2g syringe x 2 · Kit 2: 2g syringe x 4

Shades: A1, A2, A3, A3.5, B1, OA2

FarmaFlow Bulk Fill

A high-performance flowable composite for bulk filling cavities up to 4 mm in a single layer, reducing chair time and improving efficiency.

PROPERTIES

- Bulk filling up to 4 mm in a single layer
- Low polymerisation shrinkage
- High mechanical strength
- Easy handling saves time

PACKAGING

2g syringe

Shades: A1, A2, A3, A3.5

Compomers

FarmaCompomer

A light-curing compomer restorative with high fluoride release and easy adaptation, ideal for deciduous teeth, moderate class I and II, and anterior class III fillings.

PROPERTIES

- High, long-term fluoride release
- Easy and reliable adaptation
- Radiopaque
- Easy to polish and model
- Aesthetic appearance with various colour options

PACKAGING

4g syringe

Shades: A1, A2, A3, A3.5, B1, B2, Purple, Green, Blue, Pink, Orange, Red, Silver

Kit 1: 0.25g x 20 compules, mixed shades

Kit 2: 0.25g x 40 compules, mixed shades

Kit 3: 0.25g x 20 compules + FarmaSeBond + FarmaCompomer Flow

Kit 4: 0.25g x 40 compules + FarmaSeBond + FarmaCompomer Flow

FarmaCompomer Flow

A light-curing flowable compomer with high fluoride release, for deciduous teeth, moderate class I and II, and anterior class III fillings.

PROPERTIES

- Long-term fluoride release
- Smooth, reliable adaptation
- Radiopaque
- Easy polishing and modelling
- High abrasion and pressure resistance
- High adhesion to dentin and enamel
- Natural colour options

PACKAGING

2g syringe

Shades: A1, A2, A3, A3.5, B1, B2, Purple, Green, Blue, Pink, Orange, Red, Silver

Bonding Agents

FarmaBond Adhesive System

A light-curing, single-component, 5th generation universal bonding agent, compatible with all composites.

PROPERTIES

- High bond strength
- Perfect adhesion to dentin and enamel
- 5th generation technology

PACKAGING

5ml bottle

FarmaSEBond Self Etching Adhesive System

A 7th generation self-etching, light-curing, one-component adhesive that removes the need for separate phosphoric acid etching.

PROPERTIES

- MDP monomer for strong, durable bonding
- No extra etching required
- Long-lasting restorations
- Time-saving application
- 7th generation technology

PACKAGING

5ml bottle

Etching Gels

FarmaEtch Etching Gel

A high-quality 37% phosphoric acid etching gel with excellent handling and precision. The blue colour ensures accurate and effective etching.

PROPERTIES

- Easily rinsed, no residue
- Blue colour for precise application
- Optimum, consistent surface etching

PACKAGING

3ml syringe | 3ml syringe x 2 | 3ml syringe x 4 | 50ml syringe

FarmaEtch HF Porcelain Etch

A 9.5% buffered hydrofluoric acid gel that improves mechanical bonding between porcelain and adhesive agents, for porcelain restoration repairs.

PROPERTIES

- Prepares porcelain surfaces for adhesive bonding
- Buffered formula for controlled etching
- Easily rinsed, no residue

PACKAGING

3ml syringe

Porcelain Repair Kit: 3ml FarmaEtch HF + silane

Liners & Calcium Hydroxide

FarmaLiner with Glass Ionomer

A light-curing, glass ionomer-based cavity liner that protects the pulp under direct and indirect restorations, including composites, amalgams, ceramics and metal restorations.

PROPERTIES

- Excellent biocompatibility
- Fluoride release
- Radiopaque
- Excellent handling

PACKAGING

2g syringe | 2g syringe x 2 | 2g syringe x 4

FarmaCal LC Calcium Hydroxide

A light-curing material for pulp capping and lining under fillings, for both direct and indirect pulp capping.

PROPERTIES

- Direct and indirect pulp capping
- Light curing for quick setting
- Single component, convenient to use

PACKAGING

2g syringe | 2g syringe x 2 | 2g syringe x 4

FarmaCal Calcium Hydroxide Liner

A two-component, self-curing lining material for pulp capping and as a liner under restorative materials.

PROPERTIES

- Low solubility for a stable lining
- High compressive strength under restorations

PACKAGING

10g dual syringe and mixing spatula

Polishing & Try-in Pastes

Farma Dent Composite Polish Paste

An aluminium oxide-based paste for the final polishing of composite restorations, for an excellent, smooth and glossy finish.

PROPERTIES

- Excellent shine
- Thixotropic for smooth application
- Great viscosity
- Simple use

PACKAGING

2g syringe

Farma Dent Try-in Paste

A glycerine-based paste gel for prosthetic work and as an oxygen barrier, preventing the oxygen-inhibited layer on resin surfaces after polymerisation.

PROPERTIES

- Easy application
- Water soluble, easy cleanup
- Great viscosity

PACKAGING

2g syringe

Sealants & Pattern Resin

Farma Pit and Fissure Sealant

A light-curing, fluoride-releasing sealant for occlusal surfaces, sealing pits and fissures to protect against cavities.

PROPERTIES

- Fluoride releasing
- Radiopaque
- Easy application
- Low shrinkage
- Great flowable viscosity

PACKAGING

2g syringe | 2g syringe x 2 | 2g syringe x 4

Farma Dent Pattern Resin

A light-curing, single-component resin for implant transfer fixation and modelling, ideal for producing transfer jigs.

PROPERTIES

- No residue after burnout
- Blue colour for clear visibility
- High stability
- No breakdown during the procedure

PACKAGING

2g syringe

Capsule Amalgams

FarmaCap Capsule Amalgam

A high copper alloy amalgam with spherical and irregular particles, pre-dosed in self-activating capsules for firm condensation and smooth carving.

PROPERTIES

- High copper alloy
- High affinity with mercury
- Smooth carving
- Non-Gamma II

PACKAGING

50 capsules in a jar

Composition: 45% Ag – 30.5% Sn – 24% Cu – 0.5% Zn

FarmaCap NG Capsule Amalgam

A high copper alloy with a higher silver content (55% Ag) than FarmaCap, pre-dosed in self-activating capsules.

PROPERTIES

- High silver / high copper alloy
- High affinity with mercury
- Smooth carving
- Non-Gamma II

PACKAGING

50 capsules in a jar

Composition: 55% Ag – 29% Sn – 15.8% Cu – 0.2% Zn

FarmaCap High Capsule Amalgam

A high silver alloy with spherical and irregular particles, pre-dosed in self-activating capsules for ease of use and reliable performance.

PROPERTIES

- High silver content
- Non-Gamma II
- Exceptionally durable

PACKAGING

50 capsules in a jar

Composition: 69.2% Ag – 18.6% Sn – 11.9% Cu – 0.3% Zn

Powder Amalgams

Farmagam Powder Amalgam

A high copper alloy with spherical and irregular particles, for optimal amalgamation, firm condensation and smooth carving.

PROPERTIES

- High affinity with mercury
- Smooth carving
- Non-Gamma II

PACKAGING

30g powder

Composition: 45% Ag – 30.5% Sn – 24% Cu – 0.5% Zn

Farmagam High Powder Amalgam

A high silver alloy with spherical and irregular particles for firm condensation, smooth carving and durable restorations.

PROPERTIES

- Non-Gamma II
- Exceptionally durable
- Easy to process

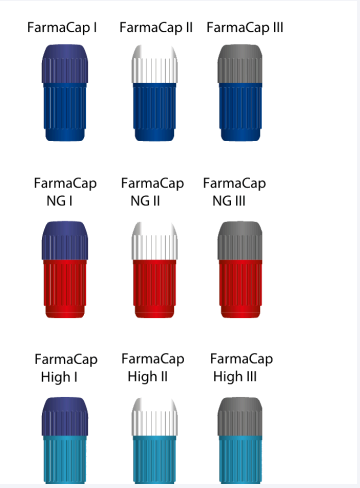

PACKAGING

30g powder

Composition: 69.2% Ag – 18.6% Sn – 11.9% Cu – 0.3% Zn

TECHNICAL PROPERTIES

- A well balanced alloy for quality fillings
- Spill 1 – 400 mg alloy / 360 mg mercury
- Spill 2 – 600 mg alloy / 540 mg mercury
- Spill 3 – 800 mg alloy / 720 mg mercury
- Spill 5 – 1200 mg alloy / 1080 mg mercury
- Working time: 4 minutes
- Carving & burnishing: 5 – 9 minutes
- Conforms to ISO 20749 pre-capsulated dental amalgam
- Compressive strength: 1h < 397 MPa · 24h < 437 MPa
- Creep: 0.99% · Dimensional change during hardening: 0.01%

Cotton rolls & crown remover	33

Polishing & Finishing

FarmaPlaton Polishing Strips

Polishing strips with different grit sizes, each strip combining two distinct grits for excellent polishing results. Flexible and easy to use, designed for precise and efficient dental polishing.

PROPERTIES

- Different grit sizes: each strip combines two types of grit for optimal polishing
- Flexible and easy to use for a wide range of procedures
- White – extra fine for polishing
- Yellow – fine for finishing
- Green – medium for contouring
- Blue – coarse for gross reduction

PACKAGING

75 pcs strips in a plastic box

6 m strip band

FarmaPlaton Polishing Discs

High-quality polishing discs for every level of finishing and polishing. Each colour represents a specific coarseness and purpose, for precise and efficient results.

PROPERTIES

- 14 mm size, suitable for a range of applications
- White – extra fine for polishing
- Yellow – fine for finishing
- Green – medium for contouring
- Blue – coarse for gross reduction
- Brown – extra coarse · Pink – double extra coarse

PACKAGING

10 discs + 1 mandrel in a pack

40 discs + 1 mandrel in a plastic box

80 discs + 1 mandrel in a plastic box

240 discs + 4 mandrels in a plastic box

80 discs + 1 mandrel + 75 strips

240 discs + 4 mandrels + 75 strips

FarmaPlaton Polisher

Polishing cups designed for efficient finishing and polishing of composite restorations, giving a smooth, glossy finish.

PROPERTIES

- Easy mounting on the mandrel for quick set-up
- Autoclavable for hygiene and reuse
- Excellent polishing performance for a brilliant finish

PACKAGING

10 pcs in a bag

Wedges & Abrasive Strips

FarmaPlaton Wooden Wedges

Wooden wedges with an anatomical form for excellent fillings. Colour-coded by size and properties for easy identification.

PROPERTIES

- Superthin short (white)
- Thin short (yellow)
- Thin long (blue)
- Medium short (pink)
- Medium long (green)

PACKAGING

100 pcs wedges in a plastic box

FarmaPlaton Transparent Wedges

Wedges formed from a transparent polymer for excellent filling, reliable performance and easy use.

PROPERTIES

- Not easy to break: long-lived and durable
- Easy to use: straightforward application and removal
- Anatomic form for optimal fit and support

PACKAGING

100 pcs in a plastic box

FarmaPlaton Stainless Steel Abrasive Strips

Strips for precise finishing and polishing of restorative materials – composites, acrylics, glass ionomers and amalgam.

PROPERTIES

- Great polishability for an excellent finish
- Effective removal of excess material and smooth surfaces
- Two sizes: 4.00 mm and 6.00 mm

PACKAGING

12 pcs of 4 mm per box

12 pcs of 6 mm per box

Articulating Papers

FarmaMark Articulating Paper Straight

High-quality articulating paper for checking occlusal contacts and ensuring accurate bite adjustments.

PROPERTIES

- Non-sticky: easy removal without residue
- Smooth surface for clear, precise markings
- Double-sided options in blue and red

PACKAGING

40µ – blue/red straight (144 pcs)

80µ – blue/red straight (72 pcs)

80µ – blue/red straight (144 pcs)

FarmaMark Articulating Paper Horseshoe

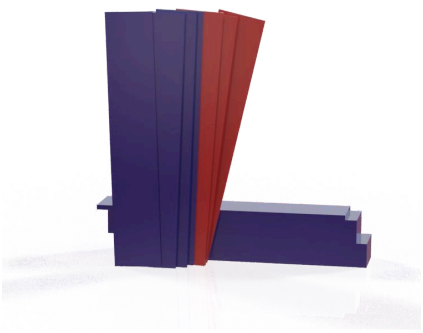

Horseshoe-form articulating paper with a thickness of 80µ, suited to precise and sensitive occlusal marking.

PROPERTIES

- Non-sticky: easy removal without residue
- Smooth surface for clear, precise markings
- Double-sided options in blue and red

PACKAGING

80µ – blue/red horseshoe (72 pcs)

FarmaMark Articulating Paper 200 Micron Straight

Sensitive 200-micron fleece paper for simple and accurate marking, available in blue and red.

PROPERTIES

- Non-sticky: easy removal without residue
- Smooth surface for clear, precise markings
- Accurate occlusal contact markings

PACKAGING

200µ – blue straight, 300 pcs

200µ – red straight, 300 pcs

200µ – blue 150 pcs / red 150 pcs

Isolation & Auxiliary

Farma Dent Dental Dam

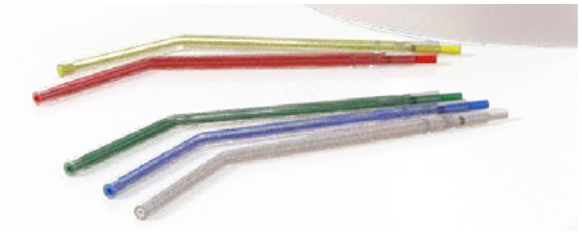

Natural rubber latex dental dam for effective isolation of the operating field, with great tear resistance and high elongation.

PROPERTIES

- Colour contrast with soft tissue for a clear working field
- Low powder for minimal residue
- Great tear resistance and high elongation
- Colours: blue, green, pink, black and silk blue
- Size: 15 cm × 15 cm (6" × 6")

PACKAGING

36 pcs per box

Farma Dent Air/Water Syringe Tips

Multi-coloured, single-use tips for air/water syringes that help minimise cross-contamination.

PROPERTIES

- Rigid plastic material for reliable performance
- Multi-colour pack for easy identification
- No sterilisation time needed
- Easy to insert and remove

PACKAGING

250 pcs per bag

Farma Dent Micro Applicators

Disposable microbrush applicators for precise, controlled application of small amounts of dental materials.

PROPERTIES

- Flexible tips bend to any angle for hard-to-reach areas
- Regular (2.5 mm) and fine (2.0 mm) sizes
- Disposable for hygiene and reduced cross-contamination

PACKAGING

Pack of 100

Cotton Rolls & Crown Remover

FarmaPlaton Cotton Roll

100% cotton rolls for effective retraction and absorbency, comfortable for both clinician and patient.

PROPERTIES

- Retracts the cheek effectively
- Non-linting
- Does not adhere to the mucous membrane
- Highly absorbent
- Keeps its shape when wet
- Size: 4 × 1 cm

PACKAGING

No. 1 – 500 pcs bag

No. 2 – 500 pcs bag

No. 3 – 500 pcs bag

FarmaCrown Remover

A practical instrument for easy, efficient crown removal using an impact method with an arc.

PROPERTIES

- Sterilisable at 134 °C
- Three types of remover tips
- Various impact levels for precision and control

PACKAGING

Crown remover instrument + 3 tips
